Response to Arguments

Claim Rejections - 35 USC § 112

I. Claims **36-37 and 43-47** have been rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The rejection of claims 36-37 and 43-47 under 35 U.S.C. 112, first paragraph, has been withdrawn in view of Applicants' remarks.

II. Claims **39-41 and 44-47** have been rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The rejection of claims 39-41 and 44-47 under 35 U.S.C. 112, second paragraph, has been withdrawn in view of Applicants' remarks.

Response to Amendment

Claim Rejections - 35 USC § 112

Claims **41 and 47** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 41

line 2, "the ... second electrically conducting layer" lacks antecedent basis.

Claim 47

line 2, "the ... second electrically conducting layer" lacks antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims **34 and 36-47** are rejected under 35 U.S.C. 102(e) as being anticipated by **Suzuki et al.** (US Patent No. 6,051,645).

Suzuki teaches a lithographic ink comprising:

(a) a metal (= magnetic fine particles) [col. 8, lines 19-21] or carbon (= carbon black) [col. 7, lines 61-66] particulate material suspended in a mixture of:

(i) a resin (col. 5, lines 28-36; and col. 19, claim 8);

(ii) an antioxidant (col. 9, lines 43-47); and

(iii) an organic solvent (col. 9, lines 11-28).

wherein the resin comprises a polyamide (= polyamide resin) [col. 5, lines 28-36; and col. 19, claim 8].

As to the claim limitation of “for use in a lithographic printing process onto a polymer substrate”, the intended use of the ink does not compositionally distinguish the ink from the prior art.

As to the claim limitations of claims 36-38 and 42-44, what the ink is printed on is the intended use of the ink does not compositionally distinguish the ink from the prior art.

As to the claim limitations of claims 39, 41, 45 and 47, attaching an electrical component does not compositionally distinguish the ink from the prior art.

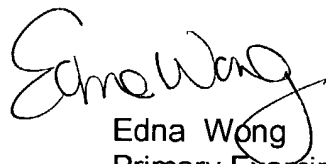

As to the claim limitations of claims 40 and 46, electroplating a second electrically conducting layer does not compositionally distinguish the ink from the prior art.
